PRODUCT SPECIFICATIONS

Broken Maize (Makka Dalia)

Broken Maize is produced by mechanically cracking premium maize kernels while preserving their nutritional value. It is widely preferred by feed manufacturers and brewing industries due to its excellent digestibility and cost efficiency.

Key Benefits:
- Highly digestible starch source
- Retains essential nutrients
- Cost-effective feed ingredient
- Supports healthy livestock growth
- Easy to process

- High nutritional value
- Cost-effective
- Uniform particle size
- Easy digestion
- Hygienically processed
- Premium export quality
- Suitable for livestock

SPECIFICATIONS

Parameter	Specification
Product Name	Broken Maize
HSN Code	10059019
Crop Year	Latest Crop
Colour	Yellow
Purity	99% Min
Moisture	14% Max
Broken	100%
Damaged	1% Max
Foreign Matter	1% Max
Packing	25 kg / 50 kg PP Bags or Custom
